

Option 5 (stepped footbridge)

EAST ELEVATION A-A
SCALE 1:100

WEST ELEVATION B-B
SCALE 1:100

Advantages:

- Shorter construction time due to pre-fabricated sections
- Minimal disruption to statutory services
- Removes the risk of pedestrians coming into contact with the operational railway

Disadvantages:

- Not accessible for persons of reduced mobility, cyclists and pushchairs
- Level crossing will need to be closed during the consultation, limiting access across the railway for several months
- Does not comply with the Equality Act 2010
- The likelihood of vandalism will be increased due to the construction of a new bridge
