The Future of Waverley Station

Welcome

Waverley Station is a key transport interchange serving Edinburgh and Scotland. Passenger numbers are estimated to more than double by 2050. A Major Project Plan for Waverley Station is currently under development. This will form the basis for a Masterplan that will complement the infrastructure development to allow for this growth from 2035.

The Masterplan process sets out a route map to develop the station and the adjacent areas to ensure it can accommodate city growth, and do so in a way that reflects the important role it holds within the city.

The masterplan consultation. The Masterplan proposals set out a range of ideas to improve your experience of the station and adjacent areas. We want to know what you think of the current station and our plans to improve it.

Understanding the site

The Station Challenges

- Requires better long-term strategies as functional and not roundRobin
- Requires to consider advances in building technology
- Requires to consider advances in building technology
- Requires to consider advances in building technology

The City Challenges

- The station is surrounded by diverse and dynamic growth
- The station is surrounded by diverse and dynamic growth
- The station is surrounded by diverse and dynamic growth
- The station is surrounded by diverse and dynamic growth

The Masterplan - Planning for the Future

The Vision

Project Objectives

- Secure the continued success of the railway network
- Secure the continued success of the railway network
- Secure the continued success of the railway network
- Secure the continued success of the railway network

Opportunities

- Promote economic growth
- Promote economic growth
- Promote economic growth
- Promote economic growth

Improvement Strategies

Circulation & Entrance

- Redesign the approach from North Bridge
- Redesign the approach from North Bridge
- Redesign the approach from North Bridge
- Redesign the approach from North Bridge

Arrival & Departure

- Create a new passenger concourse
- Create a new passenger concourse
- Create a new passenger concourse
- Create a new passenger concourse

Station Operation

- Improve management of the station
- Improve management of the station
- Improve management of the station
- Improve management of the station

Introduction of a new Northern Concourse

Development of Masterplan Approach

- Minimum Development
- Significant Development (Preferred Strategy)

Preferred Masterplan Strategy

Heritage and Existing Station Building

- New Northern Concourse
- New Northern Concourse
- New Northern Concourse

The Future of Waverley Station

Welcome

Waverley Station is a key transport interchange serving Edinburgh and Scotland. Passenger numbers are estimated to more than double over the next 30 years. Network Rail, City of Edinburgh Council, Transport Scotland and our partners have set a number of project objectives to plan for this growth with a Masterplan that considers what changes are needed over the next 30 years.

The Masterplan process sets out a route map to develop the station and the adjacent areas to ensure it can accommodate this growth, and do so in a way that is fitting for the prominent location it holds within the city.

The Masterplan proposals must recognise the architecture and heritage value of both the station and of our ideas for improvement.

The Future of Waverley Station

Welcome

Waverley Station is a key transport interchange serving Edinburgh and Scotland. Passenger numbers are estimated to more than double over the next 30 years. Network Rail, the City of Edinburgh Council and Transport Scotland have started to plan for this growth with a Masterplan that considers what changes are needed over the next 30 years.

The Masterplan process sets out a route map to develop the station and the adjacent areas to ensure it can accommodate this growth, and to do so in a way that fits into the pre-existing location it holds within the city.

This is a public consultation. The Masterplan proposal sets out a range of ideas to improve your experience of the station and adjacent areas. We want to know what you think of the current station and of our ideas for improvement.

Understanding the site

The Station Challenges

- Poor connectivity: It is very busy in some parts of the station. Improving and providing new active travel routes will help to reduce this congestion.
- Poor accessibility: It is very busy in some parts of the station. Improving and providing new active travel routes will help to reduce this congestion.

The City Challenges

- The city changes: poor accessibility leads to unpleasant places to walk through.
- The city changes: poor accessibility leads to unpleasant places to walk through.

The Vision

Project Objectives

- Creating a premier transport hub while retaining all that is special about Waverley Station.
- Maintaining all historic buildings.
- Rehabilitating historic buildings.
- Creating space for people to enjoy the station.

The Ambition

- Heritage and Existing Station Building
- Existing Development
- Current Development
- Planned Development

Imaginative Visionary Strategy

- accommodation growth
- repositioned station
- connection to North Bridge
- connection to Waverley Bridge
- connection to North Bridge
- connection to Waverley Bridge
- connection to North Bridge
- connection to Waverley Bridge

Opportunities

- Opportunities: Providing underground servicing will make the station more accessible to all.
- Opportunities: Providing underground servicing will make the station more accessible to all.
- Opportunities: Providing underground servicing will make the station more accessible to all.

Development of Masterplan Approach

- Development: Significant Development
- Development: Significant Development

Network Rail, City of Edinburgh Council, Transport Scotland and our partners want to do it in a way that is fitting for the prominent location it holds within the city.

The Masterplan provides a route map to develop the station and the adjacent areas to respond to forecast growth, and to do it in a way that is fitting for the prominent location it holds within the city.

The Masterplan process sets out a route map to develop the station and adjacent areas. We want to know what you think of the current context and our ideas for improvement.

Understanding the site

The Station Challenges

- High Peak
- Platform level
- Low quality
- Sloped
- Change in levels

The City Challenges

- Low quality
- Poor separation
- Lack of clear entrances from street level
- Generally poor quality management of this area
- Changes in height creates challenging situations.
- Accessibility

The Vision

The Ambition

- Create a sustainable economic growth of both the City of Edinburgh and Scotland.
- Be reflected in the development of a city-wide strategy.
- Create a vibrant city frontages around the station.
- Create an accessible entrance from street level.

Improvement Strategies

Opportunities

- Network Rail, City of Edinburgh Council, Transport Scotland and our partners want to do it in a way that is fitting for the prominent location it holds within the city.
